SUBJECT: Notification of Federal Release Response
Requirements for Owners and Operators of
Underground Storage Tank Systems Containing
Petroleum or Hazardous Substances, 2300 Randleman
Road, Greensboro, Guilford County

Dear Mr. Smith:

The North Carolina Department of Environment, Health, and Natural Resources (DEHNR), Division of Environmental Management (Division) is the implementing agency of the Federal Underground Storage Tank Program for the State of North Carolina under the authority of 42 U.S.C. 6991, et seq. The applicable federal rules are found at Part 280 of Title 40 of the Code of Federal Regulations (CFR).

On November 13, 1989, this office received confirmation of a release from an underground storage tank (UST) system at 2300 Randleman Road, Greensboro, Guilford County. This confirmation was in the form of a telephone call from Mr. Jim Woody from Crown Central Petroleum, Raleigh, N.C. office.

Our records show that you are the owner of the subject UST system. Owners and operators of petroleum or hazardous substance underground storage tank systems, in response to a confirmed release, must comply with the attached federal regulations. The following will give you some explanation of the requirements.

1. 40 CFR 280.61, Initial Response. You have already complied with paragraph (a); however, you must take the required actions in paragraphs (b) and (c).

2. 40 CFR 280.62 Initial Abatement Measure and Site Check. The Division is requiring you to take all six measures set out in 40 CFR 280.62(a). The report required in 40 CFR 280.62 is due on December 11, 1989.

3. 40 CFR 280.63, Initial Site Characterization. The Division is requiring you to submit a report including all the information described in 40 CFR 280.63(a). The report is due on January 4, 1990.

4. 40 CFR 280.64, Free Product Removal. If you detect the presence of free product, you must comply with this regulation. You must remove free product to the maximum extent practicable as determined by the Division. If free product is present, the Division will require you to submit a report in accordance with 40 CFR 280.64(d) which is due on January 4, 1990.

5. 40 CFR 280.65, Investigation for Soil and Groundwater Cleanup. The Division requests under 40 CFR 280.65(a)(4), that an investigation for soil and groundwater cleanup is necessary. This investigation should determine the full vertical and horizontal extent of contamination and should be submitted in a technical and field data report by March 20, 1990.

If you fail to comply with any of the above requirements, this matter may be referred to the U.S. Environmental Protection Agency who may assess civil penalties of up to \$10,000.00 for each tank for each day of violation under authority of 42 U.S.C. 6991e(d).

You should also be advised that at any point after reviewing the information submitted in compliance with 40 CFR 280.61 through 40 CFR 280.65 the Division may require you to submit additional information or to develop a corrective action plan for responding to contaminated soils and groundwater, under the authority of 40 CFR 280.66. You will be notified of the decision in a separate letter.

If you have any questions, please contact Larry K. Lucas, or me at the letterhead address or telephone number.

Sincerely,

Larry D. Coble

Tom,

This site has

been cleaned up

but no report has

been sent. Bob &

Palmieri performed work.
